## ABOUT ME

Former competitive football player with a strong athletic mindset bringing discipline resilience and teamwork into gameplay programming and interactive game design

## EDUCATION

**Reichman University - B.Sc. in Computer Science (1st Year)** 2025-2028 (expected)
Relevant coursework in programming and software developm.
Member of Hustle Hub Entrepreneurship Club and Shift Club (Game Design).

**Shenkar College of Engineering and Design** 2024-2025
in Software Engineering & Game Development & design.

**Animation Mentor** 2024-2025
Advanced Character Animation Program.

**Ohel Shem High School, Ramat Gan** 2016-2019
Extended studies in Biology and Robotics.

## SKILLS

**Programming**
C, C#, C++, Python, Java, Blueprint, HTML

**Software**
Maya, Blender, Unreal, Unity, Godot

**Languages**
Hebrew (native), English (fluent)

## PROJECTS

**VR Dracula Game for Meta Headset**
Developed a VR action game for Meta headset using Unreal Engine and Blueprints focusing on real time gameplay mechanics including player movement combat systems and enemy AI behavior while integrating animation blending state machines and performance optimization to deliver a smooth and immersive VR experience.

**Hagarinet - AMIRNET Adaptive Learning Platform**
Developed Hagarinet a personalized adaptive learning platform for the AMIRNET exam by building a scalable backend using Supabase and Python to manage user authentication data storage and progress tracking while implementing adaptive learning logic that dynamically adjusts question difficulty in real time based on user performance and system analytics.

**Frogfrenzy - Developed in Unity for Mobile**
Designed and developed Frogfrenzy a mobile game created entirely independently using Unity and C# including core gameplay mechanics level design scoring systems and player progression while applying object oriented programming principles to ensure engaging performance optimized mobile gameplay.

## WORK EXPERIENCE

**Co-Founder & Lead Developer | TakeCare (HealthTech Venture)**
Co founded and led the development of a mental health startup focused on connecting trauma survivors with therapists while designing an AI driven matching system and leading product definition backend logic and technical architecture from concept to MVP.

**Freelance Game & App Developer**
Developed games and interactive applications for clients using Unity Unreal Engine and C# combining programming game mechanics animation systems and UI assets to deliver immersive and performance optimized experiences.

**Max Credit Company 2023- 2025**
Worked in the digital team contributing to UI UX design digital assets and marketing materials while collaborating with developers and designers to enhance user experience across multiple projects.
